# The Cost of Doing Business

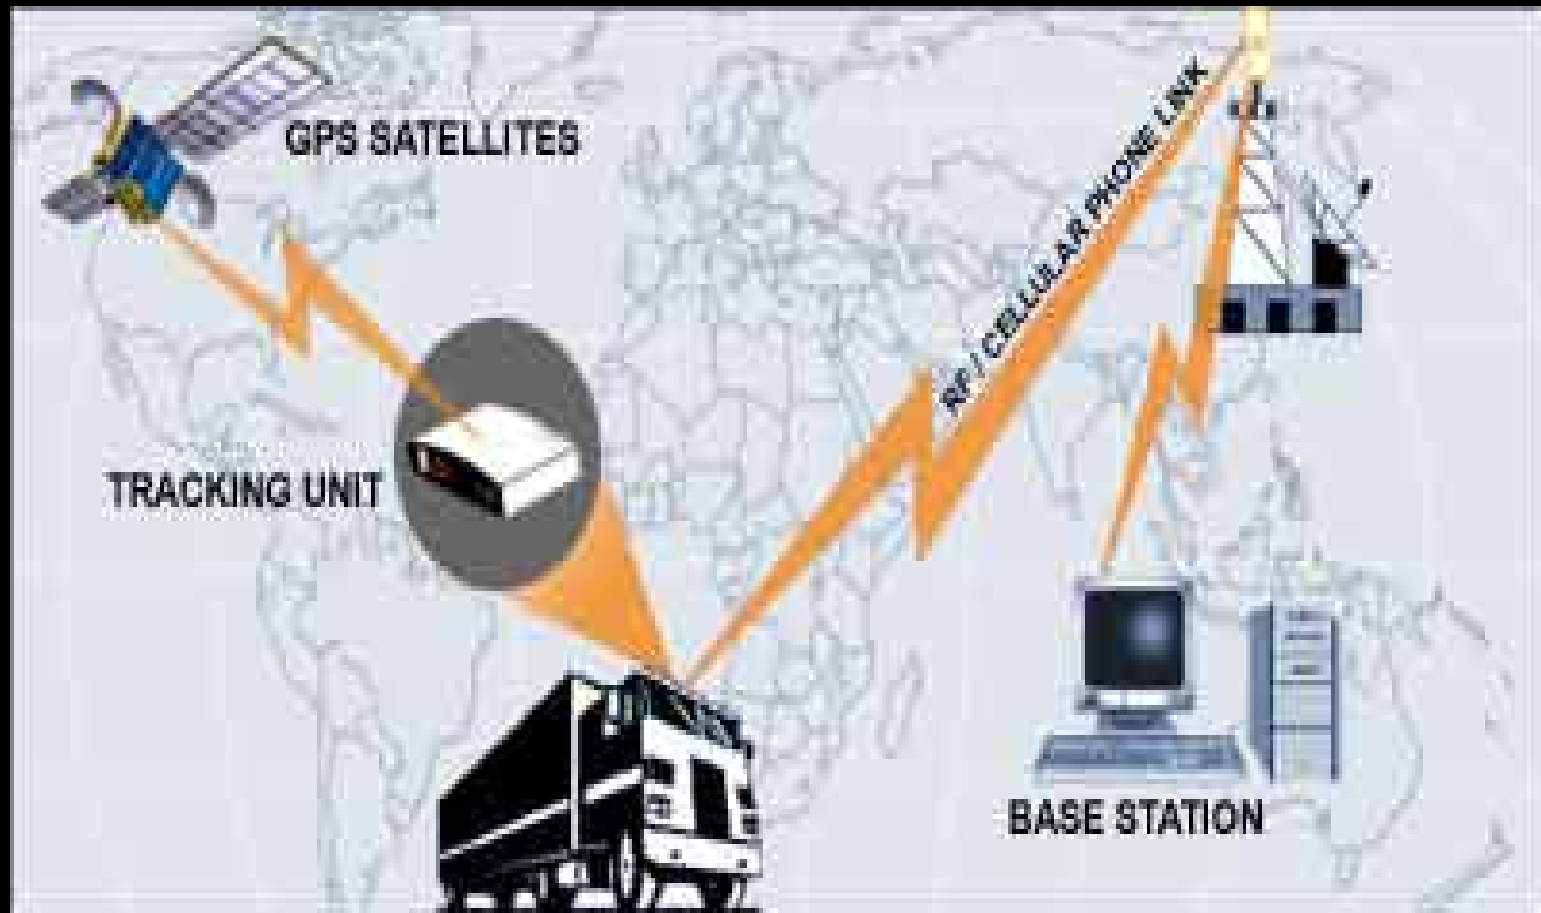

- Employee Supervision (Productivity)
- Total Cost of Ownership
- Coordinate Field Operations
- Enhance Maintenance Programs

# Meeting the Needs

- Control costs through active supervision using the power of the internet and the Global Positioning System, NAVSTAR

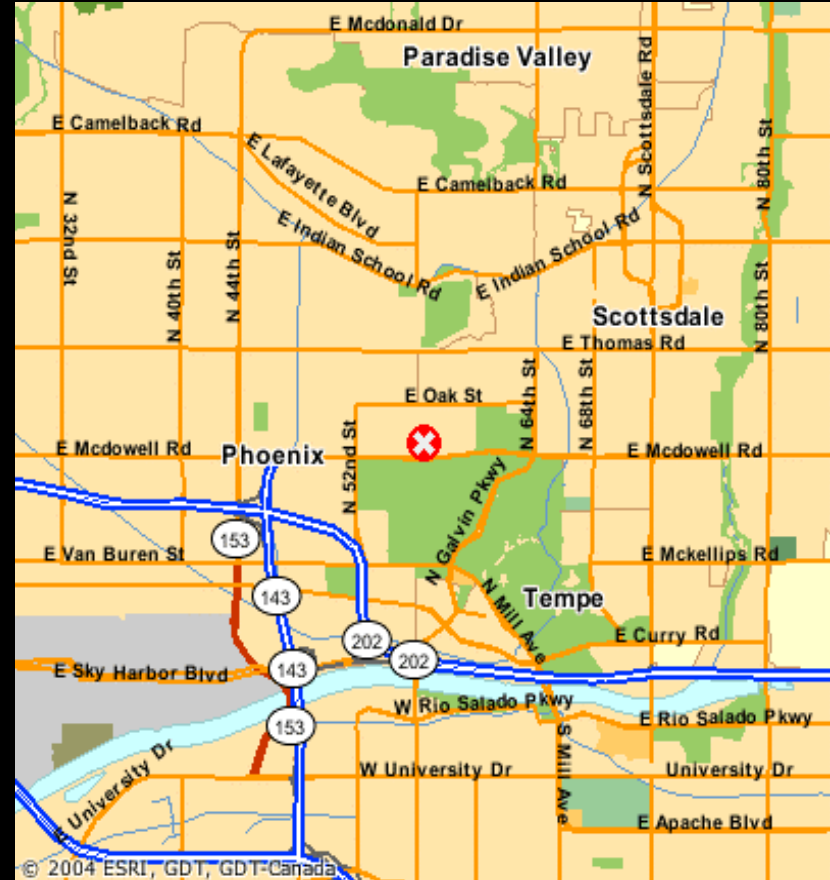

# System Infrastructure

# Satellite Photo & Street Map

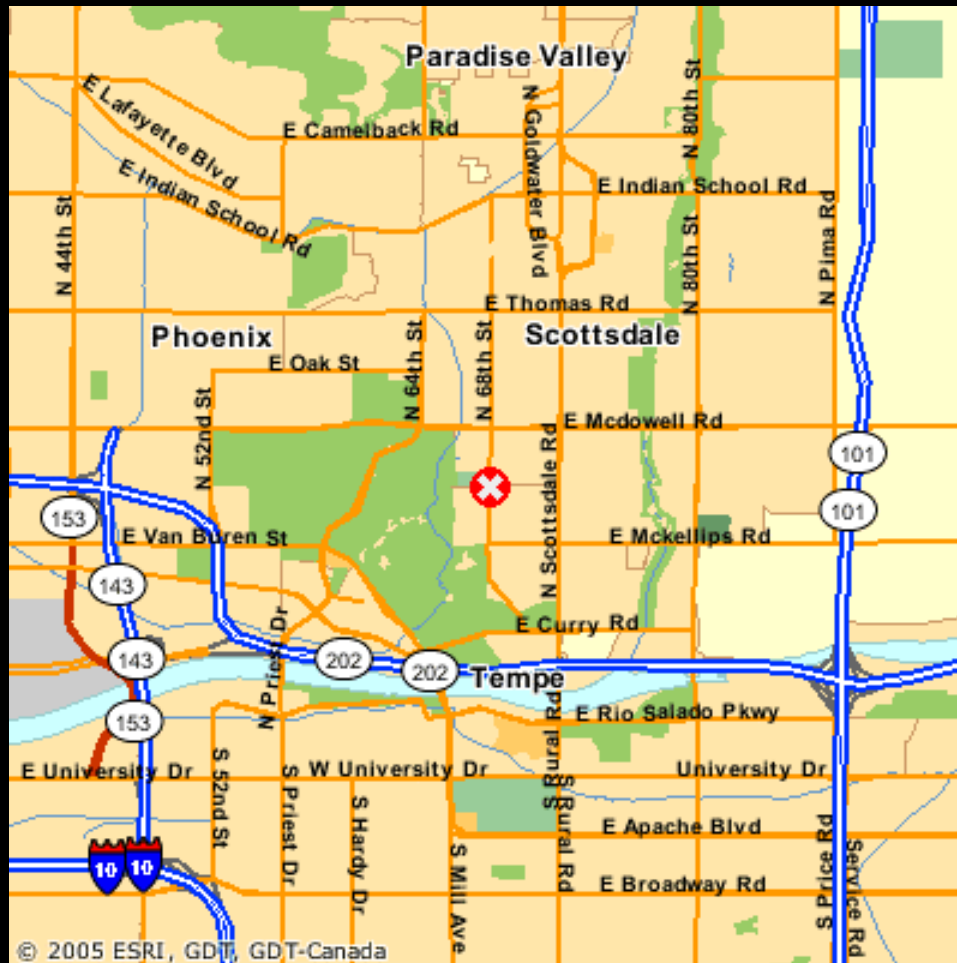

Satellite Overlay

**Address:**  
1000-1049 N 68th St,  
Tempe, AZ 85281

**Latitude:** 33.4584  
**Longitude:** -111.935067

# Tracking

- Live on demand Tracking using internet or phone 24/7
- Ignition Tracking - When ignition is turned on or off vehicle location information (including a street map) is recorded for viewing at any time
- Delivery Tracking – Vehicle is tracked in time increments while moving, again all movements are recorded in a configurable report for review

# Reporting

- Configurable history report of all actions, events, and alerts for up to 90 days in the past
- Excessive speed
- Daily, weekly, or monthly mileage reports
- Scheduled maintenance reporting
- Unauthorized movement
- Boundary violations
- Engine overheat
- Roadside assistance
- Low battery notification

# Boundaries

- Movable Boundary – Circular boundary configured as small as 1/100<sup>th</sup> of a mile and up to 500 miles from the vehicle. If the vehicle travels outside the established boundary the fleet manager is notified by phone, pager, and/or email
- Fixed boundary – A stationary boundary configurable to any shape or size needed with the same notification capabilities as the movable boundary

# Remote Controls

- Vehicle disable
- Unlock doors
- Hydraulic systems on/off
- Environmental systems on/off
- Communications systems on/off
- Remote Start
- Theft alarm enable/disable

## Scheduled Events

Vehicles can be automatically disabled at the end of the day and re-enabled in the morning at different times every day as needed. Likewise the movable boundary can be turned on and off according to company needs

Mileage reports can be scheduled for daily, weekly or monthly reporting

# Hardware Options

## Mobile Locating Unit (MLU)

Designed for covert installation in vehicles and equipment with a constant, rechargeable power source and protection from extreme weather

## Trailer Locating Unit (TLU)

Solar powered system designed for tractor trailers and large portable offices. Transceiver, Lithium Ion battery, and solar panel are enclosed in a rugged weatherproof case.

# Heavy Equipment Unit (HEU)

Sealed in a waterproof heavy duty ABS case for use on construction equipment and assets that are exposed to extreme conditions such as mud, dust, and submersion

## Warranty & Support

- All Systems carry a one year replacement guarantee
- Our technical support team uses a remote diagnostic system to help determine and correct hardware and installation problems

## ROI

- Monitoring driving habits will provide savings both in terms fuel consumption and wear and tear
- Insurance companies provide discounts of up to 25% for theft deterrent and driver supervision systems
- Attendance verification will insure you are paying your employees to work not play
- No more Moonlighting with company assets

# Monitoring Plans

Plan Type	Service Level	Retail Plan Cost	Additional Hit Charge	Phone Access
Blue 3	3	\$8.50	\$0.75	\$2.99
